1. Be certain the communicator can see the AEIOU board
2. Determine how YES and NO are indicated?
3. Ask: Do you have a message in mind?
4. Call out the first letter of each row A, E, I, O, U
5. Communicator should indicate YES when the correct row is identified
6. Go through each letter in the row starting with the vowel
7. Communicator should indicate YES when the correct letter is identified.
8. Write the letters as they are identified on the space below
9. IF a letter or a row is missed, agree that you will just repeat the process of choosing a row and letter as it is very confusing to try to tell someone to 'go back a row, or go back a letter'
10. Try to avoid saying 'no' for every row/letter that is not your choice as that uses a lot of energy
11. DO NOT GUESS without asking permission
12. Repeat back the word you think was spelled and get confirmation you are right
